

Datacard® Certified Supplies for Datacard® SP Series Card Printers

Ensure peak performance with the very best supplies

Insist on only using Datacard® Certified Supplies for your Datacard® SP Series card printers. Designed exclusively for this series, our printheads, ribbons and cleaning supplies can help you achieve the best image quality, most reliable printer performance and lowest possible cost-per-card. Datacard ribbons also leverage our patent-pending RF (radio frequency) technology to provide automated color and image density adjustment, ribbon usage tracking and ribbon conservation.

Smart ribbons in the truest sense

When a Datacard ribbon is loaded into the SP35 or SP55 card printer, the printer driver automatically adjusts printer settings to match the ribbon type, helping to ensure the best possible image quality on the cards. The printer and supplies continue working together to track print ribbon consumption and notify you of an upcoming ribbon replacement.

Our SP Series card printers feature Datacard proprietary ribbons designed specifically for the SP35 and SP55 card printers. When the printer recognizes that a Datacard ribbon is installed, all enhanced product features are enabled and successful card printing can begin. The printer will only print color images when Datacard proprietary color ribbons are installed. Datacard is your exclusive source for proprietary ribbons for the SP35 and SP55 card printers.

Remarkable image quality

Datacard color panel ribbons for the SP35 and SP55 card printer tap into our exclusive Advanced Imaging Technology™ to give you extremely crisp, vivid photos, graphics and text on full- or one-color cards. On-screen image controls enable smooth, uniform solid backgrounds, improved color matching with cameras and clearly defined edges and fine text. We also offer a range of high-quality Datacard monochrome ribbons for reliable single-color card printing.

Maximum ribbon yields help reduce costs

Datacard ribbons for the SP Series card printers offer high-yield rolls. Each ribbon is longer, allowing for more images per roll.

A lower yield YMCKT ribbon is also available to customers with low-volume printing needs.

The SP35 and SP55 card printers also feature our exclusive Ribbon Saver feature. When printing with Datacard monochrome ribbons, the printer advances the ribbon just enough to print an image, rather than the traditional full card width advancement. This feature can potentially double and even triple the standard yield of your Datacard monochrome ribbons!

Datacard color panel ribbons also take advantage of the Ribbon Saver feature. The SP35 and SP55 card

printers include smart features that automatically identify the color panel ribbon without the need to advance the ribbon, saving one complete panel set during each printer initialization

Installation is a snap

If you think operating an SP Series card printer is easy, try replacing the supplies. Print ribbons and cleaning rollers snap right into place with no tools or additional adjustments required. Printheads practically align themselves. Simply open the printer's cover, swap old for new and resume printing.

Convenient supply kits

Datacard understands that producing quality card images takes a combination of quality ribbons and a well-maintained, quality printer. One of the simplest ways to help keep your printer maintained properly is to perform regular cleaning operations.

For the SP Series card printers, we have simplified this process by including an isopropanol cleaning card and adhesive cleaning sleeve in every box of ribbons, all ordered using a single item number. Now, when it is time to replace your ribbon, you will always have cleaning supplies available to help maintain optimum performance. Additional cleaning supplies and accessories can also be ordered separately, if more frequent cleaning intervals are required.

Datacard® Certified Supplies for Datacard® SP Series Card Printers

DatacardGroup

Your best choice for supplies

Protect your investment in Datacard® solutions by only using Datacard® Certified Supplies. You can count on Datacard for all your supply needs. We engineer superior performance and reliability into every system-matched supply item we offer. For you, that means smooth printing, brilliant image quality, high security and exceptional performance. Worldwide representation creates a fast, direct connection with the supplies and support you need, when and where you need them. To ensure you are using Datacard Certified Supplies, look for ribbons that feature our distinctive *blue* cores with platinum flecks.
